Focus: (Android)

Focus is one of the more online learning apps. The service has an untold number of reference guides, books, self-help books, text books, and more. You simply share them, download them, and read them. It's delightfully old school, but some people enjoy that. Books are generally less expensive than their physical counterparts. Your device can also store tons of them without running out of space. So Focus provide large numbers of programming from various technology, some example references, programming books, Interview Questions and large numbers of technical jobs. You can also ask your doubts in our app.

Secret Book: (Android)

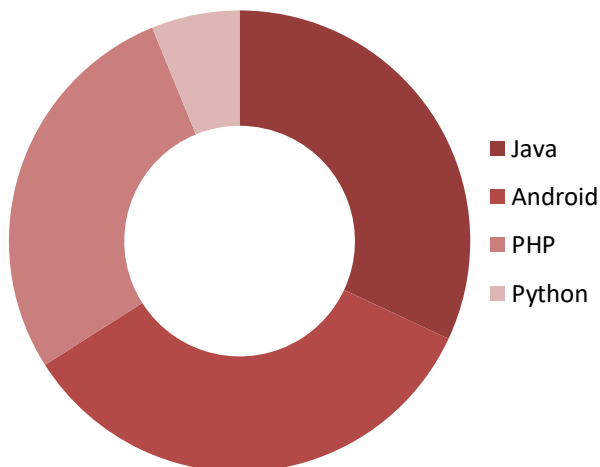

Secret Book is a fantastic privacy protection app to easily save your important data , documents that you do not want others to see. You can import your private documents in Secret Book. What's more, Secret Book has the beautiful design, it provides you the smooth and amazing media browse experience Highlight features: save your Private data, save Documents, save any events, all documents and data are encrypted.

Tailoring Management (Web)

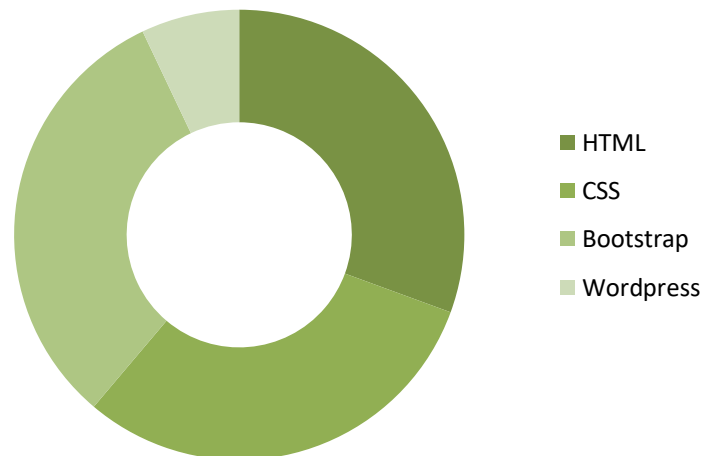

TMS Web application is designed to help tailors and fashion designers organize task and optimize performance. Among other things, the software keeps records of all sewing tasks in a Tailoring shop. This web application interface is user friendly and very easy to use. Level of digital media understanding for tailors was kept in mind while building this application. Person with almost understanding of using digital medias can still use this app.

SunsitySolutions: (WordPress)

SunSity has been at the forefront of integrated solutions for Traffic and physical safety protection. In the short span of less than a decade, the Company has established itself as a thought leader in the safety space. With a strong backend in place and a sharp customer focus, today SunSity is not only designing and integrating safety solutions but is integrating safety into your life and ensuring that your world is safe. We believe in providing maximum safety to people and minimize human and economic losses that occur due to road accidents. As a moral responsibility towards society at large, and industry as well, we are involved in increasing public awareness towards safety and traffic sense.
